

NEW LONG LIFE NOZZLE BASE FOR PT-19XL/XLS/600

Centricut's new Long Life nozzle base for use on PT-19XL, PT-19XLS and PT-600 torches lasts significantly longer than solid copper bases and improves nozzle tip cooling. Our unique design allows water to flow through the nozzle base—improving cooling of the nozzle tip and threads. Brass is used for interior and exterior threads to improve durability and eliminate thread-seizing problems.

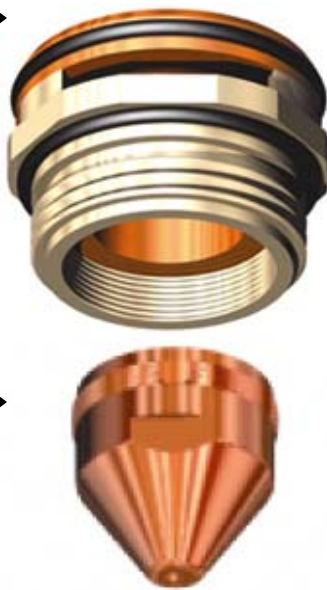

- Flow through design improves cooling
- Brass threads for durability
- Longer base life
- Longer tip life
- 100A to 400A operation

Our Long Life nozzle base enables 2-piece nozzles to be used at higher amperages without overheating.
